 #419 Name: **Lower Slough** Cause: **Lightning** Admin: **YFR**

Narrative: At 1737 the fire was discovered by a commercial aircraft pilot. The fire was approximately 1 acre in size and smoldering in spruce in a full suppression management area. It was determined that action needed to be taken and one load of smokejumpers was ordered.

At 1840 smokejumper aircraft Jump-09 responded to the area and delivered 8 smokejumpers to the fire. The fire had begun to burn into willow brush and dead and down fuels. No further resources were requested.

At 2240 IC Dibert called in and reported that they'd gotten around most of the 1-1.5 acre fire. The fire was burning in tall spruce and they hadn't found the point of origin. They estimate one day of mop-up, one day of monitor, and a possible re-supply, as one cubic exploded.

 #417 Name: **Brooks Creek** Cause: **Lightning** Admin: **L&W**

Narrative: This fire was reported by personnel on fire 240. Air attack, smokejumpers, and tankers were requested. When air attack arrived on scene the fire was 40 acres, 100 percent active, running and torching in black spruce and tundra. It plotted on State land in a limited management protection option area, but was within .5 miles of full and modified and 2 miles from structures. Three loads of smokejumpers, a heavy airtanker, three CL-215's and a Division of Forestry helicopter with a module responded to the fire. By the end of shift the fire had grown to 100 acres and was 80 percent active. The tankers were utilized to anchor the tail of the fire and slow the fire's spread. The firefighters received a load of supplies via paracargo and were working to set up hose-lays to wet-line the left flank.

# 410	Name: Little Squaw Creek		Cause: Lightning	Admin: L&W

Narrative: The fire was discovered last night (6/13) by Alaska State Troopers who reported it to Fairbanks Area Forestry. At 0812 (6/14) the report was relayed to UYT Dispatch. At 0835 an additional report was received from a private citizen who reported the fire to be approximately 2 miles south of the east end of the runway at Squaw Lake. The fire was reported to be 3 acres in size and growing. At 1225 the fire was flown by zone surveillance aircraft N9011N. Under 30% cloud cover the fire was 50% active at 5 acres in size. The fire was creeping downhill to the east in tundra on the upper 1/3 of the slope. The fire was burning on a northwest aspect and the coordinates were updated. The fire plotted in a limited suppression management area and was placed in monitor status.

Narrative: Sunny warm conditions over the Upper Tanana Valley brought low RH's, higher temperatures and high winds. The high winds have created a problem with falling trees along the line, this has impacted fire crew safety and work load for saw teams. This drier weather allowed crews to find smaller sources of heat smoldering deep in the duff. Crews continue to demobilize. Fire suppression repair work continues on parts of the fire south of the Alaska hwy.
